

2019 NORTHEAST REGIONAL INFORMATION SHARING INITIATIVE (ISI)

FBI ISI Program Information

The FBI InfraGard program is pleased to announce the deployment of the 2019 Information Sharing Initiative (ISI) program.

The Northeast ISI program was designed to maximize the benefit of the information sharing between the public and private sector. It seeks to adopt a consistent, cross-functional, multidisciplinary approach to assess and manage information sharing. This particular session will concentrate on economic espionage and insider threat considerations to information sharing between private sector companies and the Federal Government.

PROGRAM GOALS:

- Develop process together, assess and share relevant information with appropriate authorities in a timely manner.
- Utilize an enterprise risk management approach to identify and share pertinent information, including issues which may negatively impact a particular industry and/or critical infrastructure.
- Contribute toward a safer environment for all entities through partnerships and mutually beneficial information sharing practices with the FBI and others.
- Understand mutual considerations for both private sector and the federal government.
- Provide relevant, timely and actionable information to private sector entities that will better enable them to protect their industries.

Attendees will hear from subject matter experts in the private sector, the FBI, and the Office of the Director of National Intelligence (ODNI).

Keynote Speaker:

HERMANO J. FERREIRA, Senior Director Global IT Systems & CyberSecurity Medrobotics Corporation.

Presentation Title: Industrial Espionage: The Foiled Attempt to Steal Advanced Robotics. What you need to know to keep your company safe.

FBI Speakers:

SSA KEITH NELSON:

Presentation Title: The Foreign Corrupt Practices Act: Background and Current Trends. How to Conduct Business Overseas while Avoiding the Pitfalls of Foreign Bribery Schemes.

SA SCOTT MCGAUNN

Presentation Title: The Insider Threat: The Rise and Fall of American Superconductor. A Case Study.
